

Seapine Software

Mason, OH

Project Stats	
Client:	Design Build Solutions
Location:	Mason, OH
Year:	2011
Market:	Office
Project Size:	6.00 Acres

Services Provided:

SURVEYING SERVICES

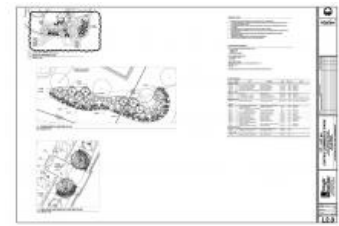

Boundary Surveys
Easement Exhibits & Descriptions
Legal Descriptions
Topographic Surveys

CIVIL ENGINEERING SERVICES

Erosion Control Planning,
Permitting & Inspection
Grading & Earthwork
Analysis
Storm Water Control
Facilities
Storm Water Pollution
Prevention Plans

LANDSCAPE ARCHITECTURE & PLANNING SERVICES

Contract Documents and
Specifications
Design Standards and
Guidelines
Planting Plans
Preliminary Budgeting -
Final Cost Estimating
Site Planning

For Seapine Software's new corporate offices, minimizing excess material was critical. Because the site was the last lot in the development, Bayer Becker's expertise in grading and balancing the earthwork to create a buildable surface with minimal excess material was called upon. Also because the site drains in two different directions, storm water design was also a key issue. Bayer Becker's design called for two separate detention basins on each side of the property, one along Western Row Road and one near Cintas that ties into an existing outlet. The two basins effectively divide the site's drainage patterns, and were sized to handle future expansion.

The overall site is bounded by roadways on three sides, including Interstate 71, so mass plantings and landscape screenings were utilized to ensure the project met the necessary zoning requirements with the City of Mason. In addition to zoning, ensuring the building views to and from Interstate 71 were acceptable was another design feature. To maximize the views, the building sits parallel to the interstate and was effectively graded to take advantage of the views.

Bayer Becker's experience with the City of Mason's regulations and zoning requirements combined with similar experience on past projects ensured a successful project for the client. The two basins on site effectively take care of the required drainage and the landscaping ensures this project not only meets code, but will also be a beautiful project to look at as people head into the City of Mason.
