

Director of Public Infrastructure Civil Engineering Design

Experience Level: 10-15years | Location: Mason, OH

Position Responsibilities

- Key management position with overall responsibility for growth and development of the firm's public sector municipal utilities services in the Ohio, Kentucky, and Indiana markets
- Business development and account management. Increase the firm's visibility in the public sector water business through active participation in municipal and county organizations. Maintain frequent contact with clients and regulatory agency personnel to determine their respective needs and requirements
- Provide the team with critical decision-making information and business intelligence on the local and regional infrastructure market to execute the business growth strategy, teaming discussions, go/no-go evaluation, and major proposal preparation
- Staff hiring, evaluation, training, coaching, and mentoring to develop the team's overall capabilities for growth of talent and competitiveness
- Design management and technical leadership guiding staff through all phases of basic project delivery functions (production coordination, planning, organizing, directing, controlling, scheduling, estimating, technical design, financial management and marketing)
- Project management including guiding clients through all phases of basic project delivery
- Developing and peer review of project construction document plans and specifications
- Regulatory coordination, permitting and attending public agency review meetings
- Coordinate communications between internal and external associates
- Ensure self and staff always uphold company core values

Position Requirements

- B.S. in Civil Engineering from an A.B.E.T. Accredited School is a plus or equivalent experience in related field.
- 10+ years of experience in civil engineering design and consulting, primarily related to public water/wastewater systems and associated infrastructure and appurtenance projects.
- Professional Engineer (PE) registration in the States of Ohio, Kentucky, and Indiana or the ability to be licensed in these states
- Wastewater collection and/or water distribution system design and modeling experience desired

Position Qualifications

- Ideal candidate should have the knowledge and passion to develop and grow a dynamic public works division.
- Demonstrated ability to sell design consulting services and solutions for public infrastructure and municipal clients.
- Actively involved in or held leadership positions in outside organizations related to the profession or consulting industry, (American Public Works Association, OH and or KY chapters)
- Demonstrated supervision and leadership experience of project technical staff.
- Demonstrated ability to manage several complex projects and staff simultaneously.
- Proven interpersonal skills, public speaking, and persuasive ability; strong project financial management and team management skills.
- Candidate must be capable of making sound engineering decisions, exercise initiative, judgment, and knowledge commensurate with the responsibilities of the position.
- Proficient working knowledge of Autodesk AEC Collection software (AutoCAD Civil 3D)
- Proficient in use of Microsoft Teams, Office, including Word, Excel, and Outlook
